

QUALITY PROGRAMS

**ELEVATING MOLDED GLASS PACKAGING
THROUGH TAILORED QUALITY SOLUTIONS**

Tailored quality for every need

AXess Reliable & cost-efficient

AXess provides reliable molded glass packaging with good quality standards and proven inspection criteria. Designed especially for high-volume pharmaceutical applications, the program combines dependable performance with an optimized Total Cost of Ownership, offering an efficient solution when cost control and consistent quality are key priorities.

AXecure Quality with greater flexibility

AXecure takes quality and service one step further, combining superior quality with greater flexibility, customization and comprehensive technical support. Designed for a broad range of parenteral drug applications, it maintains a proven inspection framework while providing an advanced technical partnership tailored to more specific product and business requirements.

SGD Pharma has developed **three dedicated quality programs for its Type I molded glass** packaging, giving pharmaceutical manufacturers the flexibility to select the solution that best matches their therapeutic application, product requirements and business environment. From cost efficiency to total quality assurance, each program provides a clear and scalable response to specific packaging needs.

AXpert Total quality assurance

AXpert is SGD Pharma's premium program for the most demanding therapeutic applications. It combines total quality assurance and enhanced cosmetic checks with additional offline quality controls and the most stringent inspection and acceptance criteria, complemented by dedicated expert support and priority technical and regulatory assistance.

The right program for your product

Every pharmaceutical product comes with specific quality, regulatory and business requirements. The three programs make it possible to select the appropriate level of inspection, quality assurance, technical support and customer service.
