

# AXpert

## THE LEADING QUALITY PACKAGING SOLUTION IDEALLY SUITED TO THE MOST DEMANDING PARENTERAL DRUG APPLICATIONS

*Best-in-class Type I molded glass vials and advanced support services*

The specialty and biological drug markets are growing at unprecedented speed, driven by complex applications including oncology, autoimmune diseases and immunology. Pharma manufacturers developing highly specialized and valuable therapeutic products, such as orphan drugs and novel cancer therapies, can tackle the strictest requirements for primary glass packaging with collaborative support from expert supply partners.

The AXpert solution delivers exemplary quality vials together with end-to-end collaborative support, tailored to your drug's unique specifications. Building on the high chemical and mechanical resistance of Type I borosilicate glass, AXpert molded glass vials are at the cutting-edge of primary packaging quality, ensuring the stability and safety of even the most challenging parenteral drugs.

### CORE BENEFITS OF AXpert

#### **Total quality assurance**

With AXpert, our premium Type I molded glass vials are subject to online automated inspection as well as additional offline quality control. This second round of rigorous inspection offers the highest cosmetic quality of vials, minimizing post-filling loss of valuable product.

#### **Proactive support and services**

Throughout the manufacturing process, from development to filling and shipping, the complete AXpert solution offers priority access to the highest level of services and support from SGD Pharma, with assistance and training tailored to your individual application needs.

## PREMIUM QUALITY VIALS FOR THE MOST VALUABLE PARENTERAL DRUGS

AXpert is ideal for high-end therapeutic products that call for the highest levels of quality and integrity in pharma and biotech markets, for applications and products such as:

**Specialty care**

**Oncology**

**Immunology**

**Blood, blood components**

**And more...**

## AXpert OFFERS YOU:

- The highest quality vials for the most specialized and highest value drugs
- Demanding and rigorous specifications for exemplary cosmetic quality
- A wide range of high-end options including ready-to-use (RTU) vials, siliconization and design to withstand harsh conditions such as lyophilization
- Proactive technical and regulatory support and complete set of services that meet your specialized pharma and biopharma applications
- Strengthened palletization and secondary packaging personalization with the option for no glass-to-glass contact trays to prevent particulate generation and breakages
- Opportunity to customize your vial design and palletization solutions, tailored to your requirements

## WHY PARTNER WITH SGD PHARMA?

### **Expert leader in molded glass**

Our technical expertise, best-in-class facilities, evolving portfolio and dedication make SGD Pharma an industry-leading manufacturer for Type I molded glass.

### **Prioritizing patient safety**

At SGD Pharma we put the needs and well-being of patients first, making sure that the potential impact of primary packaging on patient safety is considered in every decision we make.

### **Secure, consistent supply chain**

Wherever you are located, you can trust that SGD Pharma will safeguard your business continuity with a reliable, global supply of vials. This, combined with our first-rate customer service, allows us to offer a truly collaborative partnership.

### **Regulatory expertise**

The integration of pharma and legal environments is a key focus of our approach and practices. Our reliable supply and leading quality system will support a timely drug registration.
